SUMMARY

Computer Science undergraduate with internship experience in MERN stack development and backend engineering. Experienced in building RESTful APIs, database-driven applications, authentication workflows, and AI-powered web applications using React, Node.js, Express.js, MongoDB, Docker, and AWS.

EDUCATION

Meerut Institute of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering | CGPA: 8.82

Aug 2023- Present

Meerut, India

SKILLS

Languages: C++, JavaScript

Frontend: React.js

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Cloud & DevOps: AWS, Docker

Tools: Git, GitHub, Postman

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks

EXPERIENCE

UptoSkills

Oct 2025 – Feb 2026

MERN Stack Developer Intern

Remote

- Engineered RESTful APIs using Node.js and Express.js for coding problems, contests, submissions, and user management modules.
- Optimized MySQL database schemas through indexing and efficient SQL queries, improving backend query performance.
- Implemented JWT authentication, contest workflows, leaderboard ranking, request validation, and centralized error handling.
- Containerized backend services using Docker and tested REST APIs using Postman.

PROJECTS

DevLens Lite – AI Repository Intelligence Platform | *MERN, Docker, Gemini API* | devlens-lite.netlify.app

- Created an AI-powered repository analysis platform that generates dependency graphs, security insights, technology detection, and repository metrics.
- Integrated Google Gemini API to enable repository-aware codebase Q&A through natural language interactions.
- Implemented JWT authentication, repository import functionality, and generated PDF/JSON reports for repository analysis.
- Implemented JWT authentication, repository import functionality, and generated PDF/JSON reports for repository analysis.
- Containerized the application using Docker Compose for consistent local development and deployment.

Mansaathi – Mental Wellness Platform | *MERN* | mansaathi.netlify.app

- Built a secure mental wellness platform supporting mood tracking, journaling, user authentication, and personalized dashboards.
- Architected MongoDB schemas and RESTful APIs for authentication, journal management, and activity tracking.
- Integrated a rule-based chatbot to deliver instant mental wellness guidance using keyword-driven responses.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)

Quantum Computing -CDAC IIT Roorkee

Oracle Generative AI Professional

AI & ML Virtual Internship (EduSkills)
